

## HIGH-ENERGY COLLIDER PARAMETERS: $e^+e^-$ Colliders (I)

The numbers here were received from representatives of the colliders in early 2002 (contact C.G. Wohl, LBNL). Many of the numbers of course change with time, and only the latest values (or estimates) are given here; those in brackets are for coming upgrades. Quantities are, where appropriate, r.m.s.  $H$  and  $V$  indicate horizontal and vertical directions. Parameters for the defunct SPEAR, DORIS, PETRA, PEP, and TRISTAN colliders may be found in our 1996 edition (Phys. Rev. **D54**, 1 July 1996, Part I).
